Demo Link: https://iu.mediaspace.kaltura.com/media/t/1_glmi3x57

An alcohol delivery system will be used to order alcoholic beverages from an online website catalog or App and deliver them straight from the store to a customer's address. The opportunity for increased sales and growth of customer base by providing convenient, legal, and safe way of delivering alcoholic beverages to adults over the age of 21. The delivery of alcohol to adults could provide a more hassle-free shopping experience for those who are too busy to pick drinks up for the party or if you simply forget to pick up the wine for a special occasion. It also allows for a safe and legal way to get more beverages if you are running low and have already indulged. This delivery system draws in a wider range of customers based on its ease of use and convenience.
